

# THE SUNPOWER™ 25-YEAR COMBINED WARRANTY

## THE SUNPOWER DIFFERENCE

Since 1985, it has been the SunPower mission to provide the most reliable and efficient solar systems available. With more than seven million panels powering the globe, SunPower has proven the durability and reliability of our panels. We credit our success to the unique design of our patented SunPower™ Maxeon™ solar cell technology. By offering the industry's first combined power and product warranty, we are underlining our continuing commitment to deliver the best solar experience in the market.

## THE DESIGN DIFFERENCE

### SunPower Maxeon solar cell technology

The design of SunPower Maxeon solar cells is unique because each cell is built on a solid copper foundation — providing the strength and durability to survive conditions that panels are subjected to year after year.

## THE SUNPOWER WARRANTY

### 25 years of coverage without inconvenience

SunPower is proud to offer a warranty as efficient and dependable as our technology. In the unlikely event you have an under-performing panel, SunPower will make all reasonable efforts to repair or replace it.

### SUNPOWER MAXEON SOLAR CELL TECHNOLOGY

Non SunPower cells use a low-cost metal paste on the front and back-sides to conduct the power generated by the cell. SunPower Maxeon cells are built on a solid copper foundation, enabling them to handle the additional power each cell generates. This unique design makes the cells practically immune to the cracking and corrosion that causes standard solar cells to steadily lose power over time or completely fail.

# THE SUNPOWER™ 25-YEAR COMBINED WARRANTY

## SUNPOWER SIMPLICITY

By combining power and product coverage in one warranty, we have eliminated concern about the difference between manufacturing defects and power output. We give you one combined warranty, with no fine print. If an issue ever arises with your solar panel whether you work with your installer or contact SunPower directly, we will go above and beyond to solve either power or product issue.

- With over seven million panels installed, fewer than 180 have not met our performance standards\*
- Deployed over 2.5GW and operates over 1GW power plants globally
- Our long-term financial stability ensures we will be there for you for many years to come

## YOU ARE COVERED

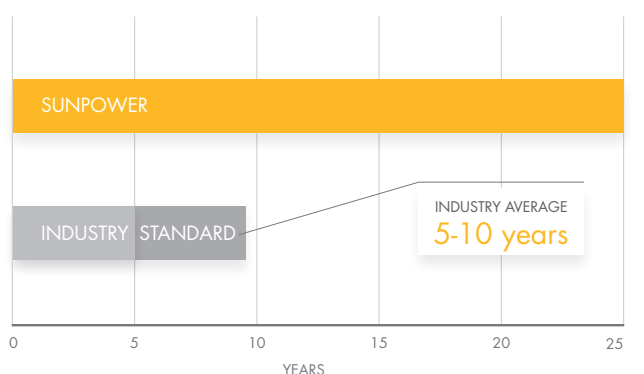

Our 25-year Combined Warranty sets a new standard for the industry in overall coverage with guarantees of high performance and repair of under-performing panels.

Power Guarantee

- More lifetime energy: 9.1% above the industry standard
- More Power: at least 95% of the Minimum Peak Power for the first five years
- Less than 0.4% annual degradation for the subsequent 20 years

Product Warranty

- The solar industry's first 25-year product and power coverage
- Financial stability and product reliability to back our commitment

Backing by SunPower gives you the peace of mind to know that our panels are built with SunPower Maxeon solar cells and durable materials designed to withstand harsh conditions for decades. The SunPower Combined Warranty represents our pledge to you that SunPower solar panels are the best you can buy.

\*All post-system-commissioning returns worldwide for panels built with Gen 2 Maxeon cells.
